

portable water system

Purpose

The NBC portable water system is an ideal accompaniment to the safeFrame™ SF3 personal Decontamination Shelter, designed for use by Emergency Responders to decon one or two people; the system offers total flexibility when a water source is not readily accessible.

It is a fully portable pressurised spray system, powered by its own internal rechargeable battery or your vehicle's 12 volt socket.

Critical Use Data

- Water Capacity - 17 Litres
- Volts - 12 V
- Power - 60 W
- Empty Weight - 7.5 Kg
- Full Weight - 24.5 Kg
- Pressure - 43.5 psi to 130.5 psi
- Hose Length - 3.0 M
- Power Cord Length - 3.1 M
- Dimensions - 450mm x 285mm x 365mm

Features & Benefits

- User-friendly purpose built portable pressure washer system for ease of use, with built in power to offer decontamination for up to two people
- The unit is driven by its own rechargeable battery giving 60 watts of power
- Patients can be decontaminated quickly and efficiently without the requirement to source water as this system has a built in tank, holding 17 litres
- The system can be conveniently transported in any vehicle due to its compact size
- Convenient trigger spray with mist setting for decontamination

Now there's a better way
